IF DEFENSE IS YOUR JOB, DEPEND ON DEFENSE NEWS.

Defense News began publishing with a difficult but achievable goal in mind. Simply stated, we want to be the authoritative news source for the defense community. Not a voice of the industry, not a forum for the government view, but a comprehensive and, most important, independent news medium.

We're aware of the proliferation of defense magazines and newsletters. We plan to be different, to provide the kind of in-depth coverage in understandable language that will make some of those other publications unnecessary reading.

We're sensitive to the complexity of defense issues and to the difficulty that professionals face in getting all the information behind those issues. And we'll serve as a solution, going the extra steps to get the full story and presenting the news in a fair, accurate and balanced manner.

If it's your job to know what's going on in defense around Washington, around the country and around the world, then *Defense News* can help you do that job more effectively.

We're on the cutting edge of defense news coverage, and already, the key players have put *Defense News* at the top of their "must read" list.
